

33rd CAFEO 2015

Penang, Malaysia
29th November - 3rd December 2015

AFEO

The ASEAN Federation of Engineering Organisations

The ASEAN Federation of Engineering Organizations (AFEO) is a non-governmental organization affiliated to the ASEAN Secretariat. Members of the AFEO are Engineering Institutions and Unions of countries in ASEAN. The objectives of AFEO are the promotion of goodwill, understanding, cooperation and exchange of ideas and experiences in the fields of education, science, engineering, technology, environment, human resource, training and registration of professional engineers.

The Conference of the ASEAN Federation of Engineering Organizations (CAFEO) has been held annually since 1982 by 10 ASEAN member countries, namely, Brunei, Indonesia, Malaysia, Singapore, Philippines, Thailand, Cambodia, Vietnam, Laos and Myanmar. The CAFEO has also attracted the participation of engineering organizations of the USA, Japan, Korea, Australia, China, India, Germany and the UK, the World Federation of Engineering Organizations (WFEO) and ASEAN Academy of Engineering and Technology (AAET).

BACKGROUND

The Institution of Engineers, Malaysia is hosting the 33rd Conference of the ASEAN Federation of Engineering Organization 2015 to be held from 22nd to 26th November. Penang is the hosting city for CAFEO 33, 2015.

The Institution of Engineers, Malaysia (IEM) Penang Branch, as the main host, is pleased to invite other engineering organizations, universities and R&D institutions to participate in this prestigious conference & exhibition with the theme below:

THEMES

From Light to Bytes: ASEAN Engineering Evolution and Future Challenges

In 1786, Captain Francis Light discovered George Town; a strategic occupation that acknowledged Penang's natural resources, harbour and its potential for commerce and as a British command station. From a humble trading port, Penang has developed over two centuries into a vital, world-class hub for commerce, manufacturing, modernization, cultures and tourism that it is today. It has been dubbed the Silicon Valley of Southeast Asia, most livable and best city and a World Heritage Site. The iconic Penang Bridge was Southeast Asia's longest in 1985 and Komtar Tower was Asia's tallest building in 1986. Today exists an even longer Second Penang Bridge. Like other ASEAN big cities, Penang's tremendous growth was in big part thanks to the huge number of engineers working diligently behind the scene. As key builders, engineers would continue to face up to the challenges of designing and constructing many future ASEAN "world cities."

SUB-THEMES

- Integrated public transportation system in urban development.
- Electrical, electronic, mechanical, information and communication technology engineering.
- Engineering and technology for sustainable infrastructure design.
- Chemical and environmental engineering development.
- Engineering education and women engineering in developing countries.
